

CTA200 Assignment 3

Shuo Chen

2026

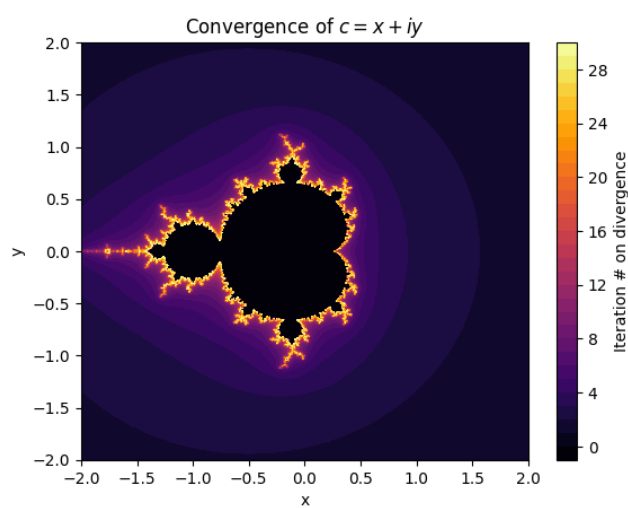

Figure 1: Regions where the recursive equation diverges or converges. Convergent values of c have iteration number -1 . (The darkest regions near the centre)

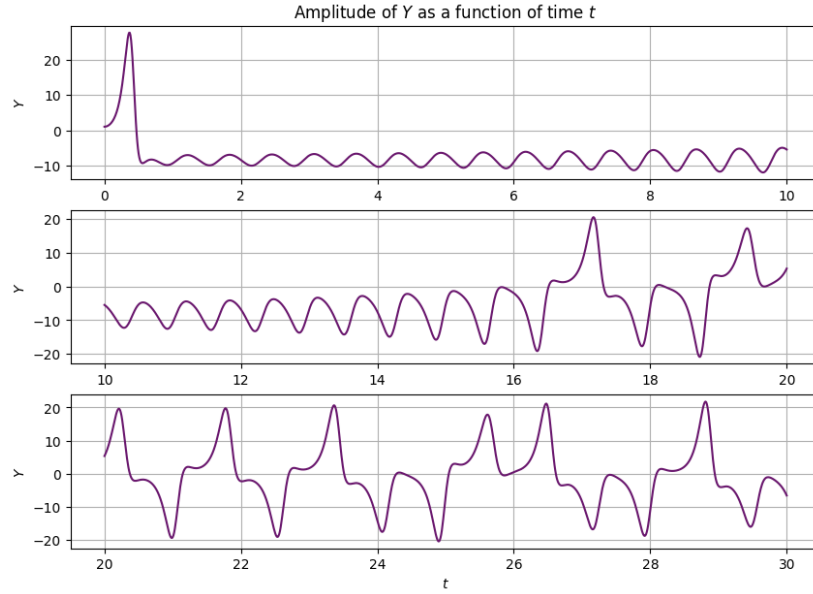

Figure 2: Simulated results for initial values $W_0 = (1, 0, 1)$. This matches with Lorenz' results in Figure 1 of their paper.

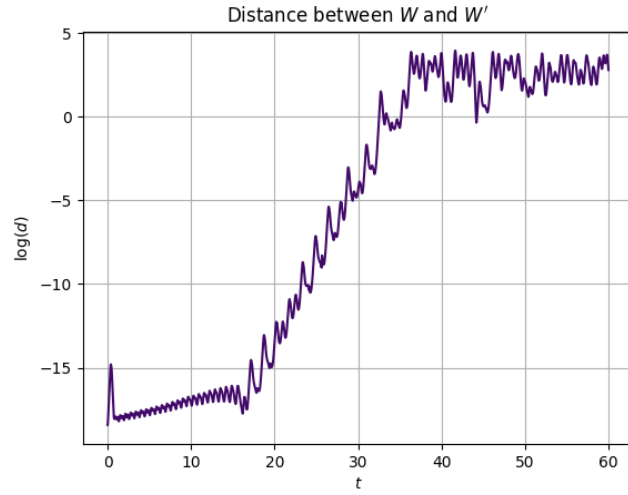

Figure 3: Distance between ODE solutions with initial values W_0 and $W'_0 = (0, 1 + 10^{-8}, 0)$ as a function of time.
